

## PRESS RELEASE

### **Lindner & Cesaro: A Powerful Partnership for the Italian Recycling Market**

*Spittal an der Drau, Austria, and Eraclea, Italy – April 2025. Lindner is further expanding its market presence in Italy and has won Cesaro Mac Import as a new distribution partner. The focus of the collaboration is on the new universal single-shaft shredder Merak 2800 and integrated system solutions for plastics recycling.*

For over 70 years, Lindner, with its headquarters and production facilities in Austria, has been a pioneer in the recycling industry. In addition to individual shredders, the company also offers complete plant solutions for processing a wide range of recyclables. In the plastics sector alone, more than 200 washing components have been put into operation worldwide together with its subsidiary Lindner Washtech.

Since April 15, 2025, Cesaro Mac Import has been strengthening Lindner's sales network in Italy. Based in Veneto, the company has specialised in machine solutions for environmental technology for decades and, like Lindner, stands for quality, innovation and comprehensive service expertise.

The partnership underlines the shared ambition of sustainably serving the Italian recycling market with efficient, innovative technologies. The focus is on the Merak 2800, a particularly powerful and versatile semi-mobile single-shaft shredder, as well as on scrap recycling, and Lindner's comprehensive system solutions for plastics recycling. Gerhard Gamper, Head of Lindner's Mobile Shredding Division, says, 'We are delighted to have Cesaro at our side because they are an experienced sales partner committed to quality and service. We look forward to an excellent partnership.'

Cesaro Mac Import at the Lindner Headquarter in Spittal, Drau/Italy. "We are delighted to have Cesaro at our side. He is a very experienced partner, committed to quality and service. We look forward to an excellent partnership", states Gerhard Gamper, Head of Lindner's Mobile Shredding Division.

**About Lindner, Spittal an der Drau/Austria [www.lindner.com](http://www.lindner.com) MAKE THE MOST OF WASTE.**

The Lindner family business has been offering innovative, tried-and-tested shredding solutions for over 75 years. At its production facilities in Spittal/Drau and Feistritz/Drau in Austria, Lindner uses state-of-the-art production machinery to manufacture shredders, system components and spare parts that are exported to almost one hundred countries. In addition to stationary and mobile shredders for waste recovery, the portfolio also includes complete systems for plastics recycling, SRF/RDF and waste wood processing. The shredders can be used for applications including municipal solid waste, commercial and industrial waste, waste wood, plastics, packaging material, paper and light scrap. Besides its headquarters in Spittal/Drau and a second production site in Feistritz/Drau, Lindner is also present in Germany, France, the USA and Asia with a total of eight sales locations and service hubs.

**About Cesaro Mac Import, Eracela (VE), Italy <https://www.cesaromacimport.com/en/>**

With over 40 years of experience, Cesaro Mac Import is a leading Italian company in Italy providing solutions and systems for treating solid and metal waste. As a family-run business, it stands out for its reliable and personalised approach, selecting and distributing cutting-edge technologies and supporting clients with a comprehensive service — from technical consultancy to commissioning and after-sales assistance. With a widespread network and a highly specialised team, Cesaro Mac Import is committed to promoting a more efficient, sustainable, and innovative recycling industry on an everyday basis.
